

# BULLY DOG

# COMING SOON

## GT-T<sup>+</sup> Part# 40450

## gauge **GT**<sup>T+</sup> tuner

The Bully Dog GT Tuner for Toyota will be the first tuning device available for the Toyota. The GT T+ will offer increases in power, fuel economy and performance as well as a huge number of monitoring capabilities that will let drivers know exactly how well their vehicle is performing. Our tuning levels include; a "Stock" tune, which allows drivers to use the long list of downloadable features, a "Tow" tune, which will adjust the power levels to help your engine pull more efficiently, a "Regular" tune, which will help your engine unlock horsepower and torque, and maybe most exciting is the "Premium" tune, which is where you really can see what your engine can do, maxing out your horsepower, speed and torque. The GT for Toyota also offers data logging, which means over time you can collect information about your engines performance, as well as a bounty of features that you can use to optimize your driving experience. A motto we live by is that the Bully Dog tune is a necessity, not a luxury.

*Contact your Bully Dog sales rep today to find out more on this exciting product.*
