

FLASH

**ALBM - Adjustable
Locking Aluminum**

Fastway® Flash™ ALBM (Adjustable Locking Ball Mount)

The Fastway® Flash™ ALBM gives you lightning quick adjustments, maximum theft protection and stunning good looks. The integrated locking system is an upgrade in both security and convenience from a traditional locking hitch pin, because it cannot be snapped off by a would-be thief and because there is no separate hardware to mess with – it's all built right into the hitch. Dual hitch balls make a changeover for towing different trailers a snap. The hidden adjustment pins and hand-polish outshine the competition to make your truck look its best.

Every Fastway Flash ALBM model features:

- Aircraft-grade billet aluminum and stainless steel construction
- Super strong stainless steel integrated lock pins
- V-5 – 10,000 lb. max trailer weight; 1,500 lb. max tongue weight
- Easy access front-facing locks
- Hand-polished mirror finish
- Limited one year warranty

ALBM - Maximum Theft Protection
