2015 FORD F150 4WD 6" SYSTEMS

NEW PRODUCT

OVERVIEW

In cooperation with Ford Motor Company, Fabtech has developed two 6" Suspension Systems for the all new 2015 F150.

These new systems include heavy duty 1/4" thick steel lower control arm crossmembers with an integrated front differential skid plate for protection and increased front suspension strength. This is an important construction feature to properly handle large tires on and offroad. Fabtech's extended length ductile iron steering knuckles allow use of 18", 20" or 22" wheels.

The Basic System includes front spacers utilizing the factory Coilover shocks to retain the stock ride while the rear receives Fabtech Performance twin tube shocks.

The Performance System comes with Dirt Logic 2.5 Coilovers featuring Eibach coil springs in the front and Dirt Logic 2.25 in the rear for aggressive offroad driving.
