

## Superchips Racing Announces **ALL NEW** Dodge Diesel Racing Tuner is Now Available

Superchips Racing Dodge Diesel tuner (part no. 3856) is the newest product in a long line of vehicle performance programmers. The racing tuner is specifically designed for high performance racing environments on vehicles with modified free-flowing exhaust systems including drag racing, sled pulling, closed course road and trail racing. Race tuning is available for **2007 – 2009 Dodge 6.7L Cummins powered trucks**.

The racing tuner is easy-to-use and includes up to four high performance tunes and one extreme race tune that require activation through Superchips. The included tunes deliver power gains **up to 136 HP and 299 lbs-ft TQ**. More extreme tunes that deliver up to **181 HP and 422 lbs-ft TQ** are available through Superchips Internet Update software at an additional price of \$100.

Additional features include diesel particulate filter (DPF) and exhaust gas recirculation (EGR) management, speed limiter adjustment, rev limiter adjustment, diagnostic read & clear, and real time performance monitoring for over 20 PIDs, ¼-mile and 0 – 60 times.

Superchips Racing tuning delivers more to-the-wheels power than other popular Dodge racing tuners all while eliminating common problems found in the other products including an overly sensitive pedal, engine surge and abrupt shifts.
