OVERVIEW

Our new Dodge 1500 6" system features Fabtech's proven IFS technology with extended length steering knuckles for proper factory electronic stability control functionality. Heavy duty 1/4" thick steel lower control arm crossmembers provide superior ground clearance while the integrated front differential skid plate adds protection to the drivetrain.

In the Basic system lift is accomplished via a steel coilover shock spacer system retaining the stock ride characteristics of the vehicle. The Performance system features Dirt Logic 2.5 Coilover shocks providing superior damping control for the aggressive driver.

Rear lift is accomplished with replacement performance coil springs along with new upper and lower link arms for the proper pinion angle.

FEATURES AND BENEFITS

- Arched lower control arm crossmembers and integrated differential skid plate are constructed of 1/4" thick steel for maximum strength and rigidity. 33% thicker than the competition.
- Includes crossmember impact struts, sway bar brackets, brake line extensions, bump stop brackets and rear track bar bracket.
- Rear lift includes replacement coil springs with new upper and lower link arms for maximum ground clearance. No rear link brackets hanging down
- Systems available include Basic for use with factory front Coilover shocks or Performance with Dirt Logic 2.5 Coilover shocks

INSTALLATION & TECH

- Estimated installation time - 5-6 hrs.
- Amount of holes to drill for installation - 1
- Disassembly of factory coilover- NO
- Transmission indexing ring required - NO
- Welding Required - No
- Driveshaft Modification Required - No

TIRE AND WHEEL SIZE

Tire - 325/65R18 Wheel - 18x9 w/ 5" BS

Tire - 35/12.50R20 Wheel - 20x10 w/ 4 1/2" BS
