

## NEW PRODUCT: JK SWITCH PANEL

### SWITCH PANEL Features & Benefits

- Easy Installation
- Matches Factory Finish and Color
- Install Up to 5 Rocker Switches
- Installs in Front of Shift Lever on the Center Console
- No Trimming Required. Attaches Using Factory Clips
- Made in the USA

For the 2011 year model, Jeep significantly upgraded the Wrangler JK's interior. So, the engineers at Daystar set out to design an all new switch panel that would work in the new Wrangler JK's interior. Daystar's all NEW Switch Panel places up to 5 rockers switches for running compressors, winches, lights, etc. in the ideal location, right in front of the shifter\*. Plus, installation is simple and utilizes the factory clips. The all NEW Daystar Switch Panel matches the 11-12 JK's dash texture and is available in two colors, black (BK) and tan (TN). Twenty Amp. marine-grade rocker switches are available separately.

SWITCH PANEL
