2011-2012 NEW PRODUCTS

4" 2011-UP GM 2500 HD SST LIFT KIT - NOW AVAILABLE

ReadyLIFT® is proud to announce the long awaited SST Lift Kit for 2011-UP Chevy and GMC 2500HD/3500HD trucks is now available! With the success of the 4.0" SST Lift Kit for GM 1500 trucks, ReadyLIFT® is pleased to offer a true bolt-on SST Lift Kit for the new GM 2500 HD Silverado and Sierra/Denali trucks. We have spent the past year testing and refining this great new SST Lift Kit to withstand every situation our development team could throw at it. This kit will raise the new GM HD trucks up to 4 inches when using larger aftermarket wheels and tires. Actual height increase will vary from vehicle to vehicle. That translates to increased ground clearance and a much taller, more aggressive stance! The 69-3411 and 69-3412 SST Lift Kits feature heavy-duty tube steel upper control arms, a pair of ReadyLIFT® forged torsion keys indexed specifically for this kit, CNC machined differential drop brackets for 4WD applications and incredibly strong tie rod steering assemblies which are a big improvement over the OEM design. To lift the rear, each kit includes a pair of OEM-style cast iron rear blocks and new u-bolts. The 69-3411 kit includes a 1-inch rear block while the 69-3412 kit includes a 2-inch Tow Package rear block. All necessary hardware and new heavy-duty rear shock extensions are also included with this great new GM HD SST Lift Kit. Installation of the 2011-UP GM 2500HD SST Lift Kit allows for the installation of up to 34" tall off road tires! NOTE: Kit requires longer front shocks - not included. Recommend ReadyLIFT SST9000 99-3414F shocks - sold separately.

Part# 69-3412 Shown

WHY IT'S BETTER!

- Allows up to 34" tires on factory offset wheels.
- Keep stock suspension "feel" while raising the 2011-UP GM 2500 HD truck up to 4.0" when using taller off road tires and wheels.
- Gain tire and ground clearance.
- Kits do not include front shocks - longer shocks are required - Recommend ReadyLIFT SST9000 99-3414F front shocks - sold separately.
- Kits include NEW Heavy Duty Tie Rod Assemblies.
- Stock ride quality retained when properly installed.
- Easily removed for leased vehicles.
- Guaranteed for the life of your vehicle.
- The fastest, least expensive way to lift your truck
- The Strongest and Safest Lift Kit for the new GM 2500HD trucks.
- Includes ReadyLIFT Forged Torsion Keys specifically indexed for this kit.
- The most complete bolt-on SST Lift Kit for 2011-UP GM 2500HD trucks on the market today!

PART#	YEAR	CHEVY/GMC	LIFT	MAP/MSRP	JOBBER
69-3411 NEW	2011-UP	SILVERADO / SIERRA / DENALI 2500/3500HD	4.0" F - 1.0" R	2WD/4WD	\$1,299.95 \$1,199.95
69-3412 NEW	2011-UP	SILVERADO / SIERRA / DENALI 2500/3500HD -TOW PACKAGE	4.0" F - 2.0" R	2WD/4WD	\$1,299.95 \$1,199.95

Both 69-3411 and 69-3412 Require longer front shocks - sold separately. Recommend ReadyLIFT SST9000 shocks 99-3414F Single Rear Wheel Only - Will not work on trucks with the TOP overload spring often referred to as a camper package.
