

OPTIMA™ CHARGERS

THE ULTIMATE POWER SOURCE™

Digital 1200 12V Performance Charger and Battery Maintainer

For 12V Automotive, Motorcycle, Marine, Tractor, Power Sports, RVs and More

- Microprocessor controlled
- Enhances the performance of OPTIMA & other AGM batteries
- Charges, conditions and maintains 12V AGM & flooded batteries
- Recovers deeply discharged batteries & extends battery life
- LCD battery charging gauge & quick set selections for easy operation
- Integrated (+) charging clamp LED work light with non-slip grips
- USB charging port compatible with iPad, iPhone, cell phones & cameras
- Battery maintainer port & cable for stored vehicles
- High-Efficiency 12 Amp charging outperforms conventional chargers

THE ULTIMATE POWER SOURCE™

Digital 1200 Performance Charging Features

- Spark-free connection technology
- Reverse polarity and over temperature protection
- At-a-glance battery connected and check battery icons
- Ambient air temperature compensation during charging
- Precharge battery status display mode
- Integrated DC cable storage compartment

**Non-Slip
Heavy Duty
Clamps**

Best in Class Features

LCD Battery Charging Gauge

Backlit LCD display for charging, maintaining, and fault mode indication. Gauge displays battery charging (fill) rate with charger mode and fault messages.

Integrated LED Work Light

Ergonomically designed DC charging clamps. Positive clamp comes with push button activated LED light to illuminate battery terminals for easy hook-ups in the darkest of conditions.

Quick Set Selections

LED directional indicators prompt user for quick and easy selection of charge profiles by battery type or battery maintainer by connection type (DC clamps or ring terminal cable assembly for stored or seasonal use vehicles).

USB/Maintenance Port

USB charging for iPads, iPhones and other devices such as cameras and phones. Installation ring terminal/extension cable included for maintaining batteries during storage periods.

Technical Specifications:

AC Input:	DC Output:
90 to 135 VAC 60 Hz	13.3 to 14.9 VDC Digitally & Temperature Controlled
Charge Rate:	Battery Types:
12 Amps Maximum Large Batteries Up to 3 Amps Small Batteries & 0 to 4 Amp Maintain Mode	AGM and Flooded (Lead Acid) Batteries - 12V Auto / Marine - 12V Motorcycle / Power Sports
Cables:	12V OPTIMA and High Performance AGM Batteries - Starting AGMs include OPTIMA RedTop & BlueTop - Dual Purpose AGMs include OPTIMA YellowTop & BlueTop
6' AC and DC Cable 6' Maintainer Cable
