

BEDRUG[®]

NEXT GENERATION BEDLINERS

Instructions on How to Box a BedRug[®]

Many reusable BedRugs are ruined as result of improper boxing. By following these simple procedures, your BedRug can be shipped without causing damage.

1. The BedRug should be cleaned before boxing.
2. Unzip the BedRug. This separates the sides/ bulkhead part from the floor/ tailgate part. Remove any of the 2" hook pieces that may still be attached.
3. Turn the floor/tailgate part over, ribbed foam side up. (See Figure 1)
4. Lay the sides/bulkhead part on the floor section as shown in Figure 2 and smooth out to reduce wrinkling. This part will roll-up inside the floor/tailgate part.
5. Roll-up the floor section beginning from the front and ending with the tailgate piece. The sides/bulkhead part will have rolled-up inside the floor/tailgate section. (See Figure 3)

Important: The fabric side must be on the outside of the roll.

6. Insert into box.
